The East Carolina University Campus Fire Log is a record of all reported fires that have occurred in on-campus student housing facilities. Fire is defined as "any instance of open flame or other burning in a place not intended to contain the burning or in an uncontrolled manner." **This Log includes fire events only.** Alarm data associated with non-fire events (evacuation drills, system testing, smoke where there is no open flame or burning, etc.) is maintained by Environmental Health and Safety (EH&S) in a separate location. Contact EH&S at (252) 328-6166 or safety@ecu.edu for additional information.
